## SERVICE INFORMATION

- Components configuration on exploded view may differ in case of specific versions. However, the actual components are discernable by code number.
- If a repair has been made, make sure that all functions of the appliance are working correctly.
- The spare parts have been standardized in colour and function as much as possible
- (..) = standardized spare part in appliance concerned
- .. = original spare part in appliance concerned
- Item 7 dustchamber cover ( remote control versions). Use a isolated short-bridge between the middle and the N-marked contact, to imitate the low-voltage (9V=) rem.contr.-hose.
- Item 15A Linen dustbag is used in those countries where paper dustbags are not available.
- Item 19 (without c.w.knob) must be placed after the cleaner has been assembled
- Item 27 If requested, remove the plug(s) concerned or add a hole(s) corresponding to the hole(s) in the original dust chamber, before connecting suction tube of dustbag full indicator (and cord winder coolhose)
- Item 28 is only placed in the low voltage versions (100-127V)
- Item 52 The RPM can be adjusted by means of the potentiometer on the pcb. The RPM is correctly adjusted if the motor starts automatically and continues to run smoothly with the on/off switch and the adjustable potentiometer in minimum position.
- Item 70 up to and including 88. The assembly of accessories depends on the national version.
- Item 101 is provide with the long cord winder spring; a long and a short cord can be used in combination with this spring.
- To demount the cordwinder use TORX screw driver no T15, which is one of a set consisting T20, T15, T10, T9, T8, T7 and T6 = 4822 395 50145.
- Item 104 up to and including 111. Depending on the lenght of the cord winder spring, the cord must be shortened.
